BETTER WILD

Weekly Performance Analysis

Nikolas Carruthers

Made with GAMMA

Overall Snapshot

SUMMARY

Campaign Overview

BetterWild's influencer program spans 9 active creators across TikTok and Instagram, generating meaningful organic reach with significant variation in performance by platform, creator, and content style.

CONTEXT

Likes are the primary engagement signal tracked in this analysis. Instagram view counts are inflated by passive, non-interactive views and do not reflect true audience engagement the way likes do.

This report surfaces which creators, platforms, and content hooks are driving the most resonance — and where we should double down.

Made with GAMMA

Platform Performance: TikTok vs. Instagram

TikTok — ~118 Avg Likes/Post

- 5–6x higher like rate than Instagram
- Same content consistently outperforms on TikTok
- Dental and emotional content performs especially well

Instagram — ~21 Avg Likes/Post

- View counts appear high but don't convert to engagement
- IG counts passive, non-interactive views in reach metrics
- Like-based engagement is significantly lower than TikTok

The data is clear: TikTok is BetterWild's primary engagement engine. Instagram views are misleading — passive scrolling inflates view counts, but audiences are not actively engaging. Budget, briefing, and creative effort should be weighted heavily toward TikTok.

Likes by Creator: Who's Driving Results

Lauren Stein — 5,381 likes · 42%

The #1 creator by a wide margin. Her TikTok account *doglifelauren* consistently hits 800–1,600+ views per video. She drives nearly half of all program likes.

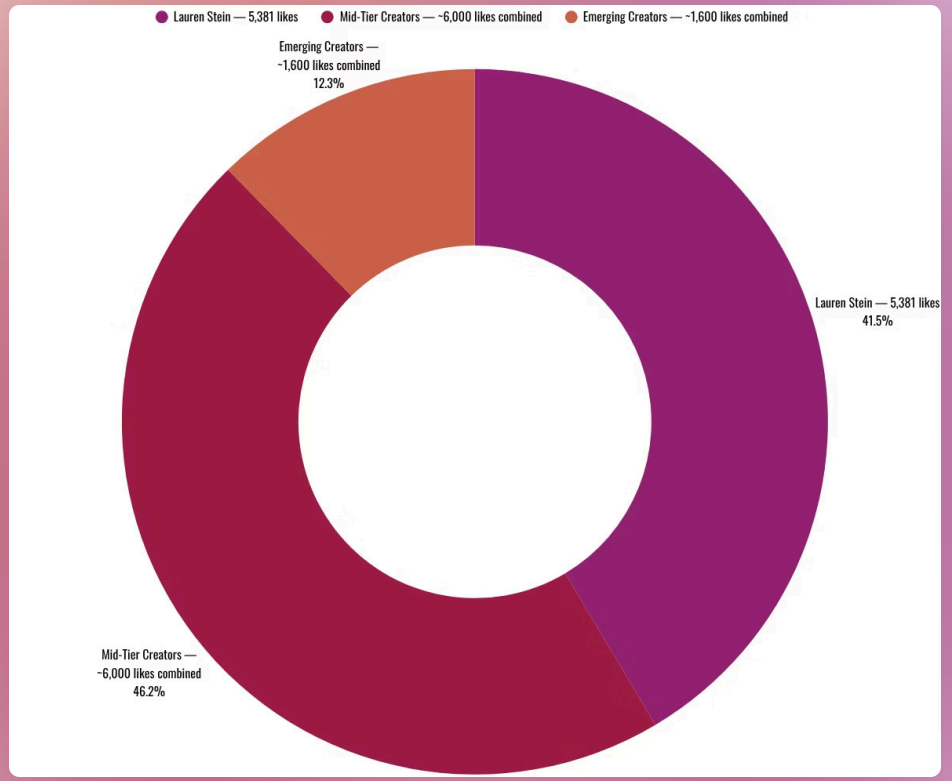

Emerging Creators — ~1,600 likes combined

Riley Baker (~8%), Michelle Shen (~6%), Suzanne Benkert (~4%), and Kamryn May (~3%) round out the roster. These creators have room to grow with stronger hooks and TikTok-first briefing.

Mid-Tier Creators — ~6,000 likes combined

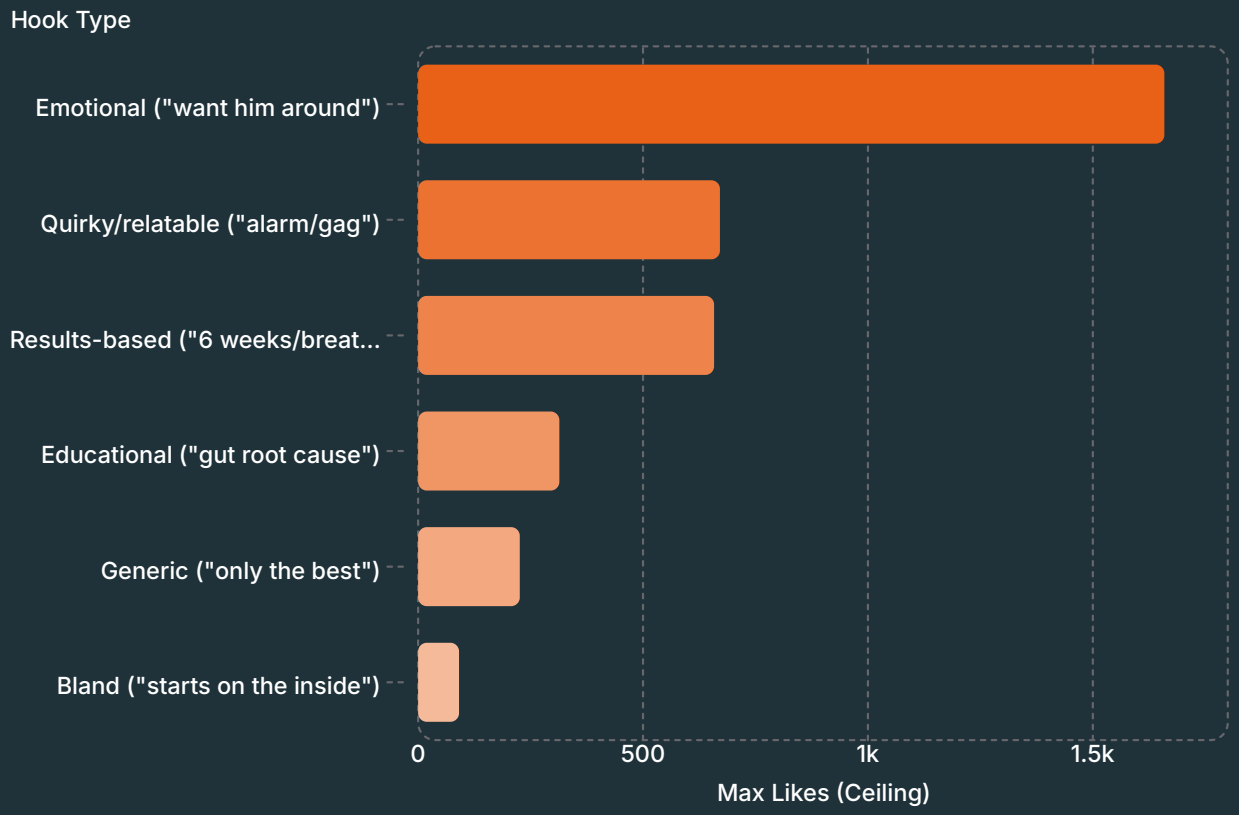

Miah Schopfer (~13%), Madison Forsman (~12%), Alyson Mallon (~11%), and Christian Zepeda (~9%) each contribute meaningfully. Alyson's "alarm every morning" post earned 20 shares — the most of any post in the program.

Creator concentration is a real risk - Lauren Stein alone accounts for 42% of all likes. While she's a clear priority for continued investment, diversifying performance across the mid-tier roster reduces dependency and increases program resilience.

Hook & Content Type Performance

Hook ceiling scores reflect the highest likes observed across posts using each content pattern. Emotional and results-driven hooks show the widest performance range and highest upside.

Hook Tier Breakdown

Tier 1 — High ceiling (300–1,659 likes): Emotional longevity hooks dominate. "I want him around as long as possible" is the single best-performing line across multiple creators.

Tier 2 — Strong (150–671 likes): Results-based and quirky/relatable hooks both perform well and reliably. Relatable behavior (like the "alarm" post) also drives shares, not just likes.

Tier 3 — Weak (2–226 likes): Generic product praise and brand-name-first hooks consistently underperform. Long-form educational scripts also pull lower numbers than short, punchy content.

Beyond Likes: Unlocking Purchase Intent with Saves

While likes indicate enjoyment, **saves** are a stronger signal of active purchase intent. This metric reveals content that viewers bookmark for future action.

Top Posts by Save Rate

Lauren Stein's Top Post

43 saves / 1,659 likes = **2.6% save rate**

Emotional appeal "You're going to break my heart so bad one day you don't even know"

Alyson Mallon's "Alarm" Post

15 saves / 671 likes = **2.2% save rate**

Emotional, highly shareable pet relationship content

Miah Schopfer's allergy post:

6 saves / 151 likes = **3.9%**

Testimony, problem solution, talkiong head, ad feeling

Key Patterns & Strategic Takeaways

TikTok >> Instagram

5–6x more likes on TikTok for the same content. IG views are misleading — prioritize TikTok briefing and posting cadence.

Emotional Hooks Win

The longevity/love angle — "I want him around as long as possible" — is the single strongest hook across all creators. Lead with love, not features.

Quirky = Shares

Alyson Mallon's "alarm every morning" post earned 20 shares — the program's highest. Relatable, funny behavior drives distribution, not just passive likes.

Additional signals: Dental supplement posts (fresh breath angle) outperform allergy posts on TikTok — tangible, humorous outcomes resonate. Long-form gut-health scripts from Christian Zepeda pull 80–106 likes vs. his short posts at similar or higher numbers. **Short always wins.**

Recommendations & Next Steps

TikTok

#1

Platform Priority

Shift creative briefs and posting schedules to be TikTok-first

Lauren Stein

Increase posting frequency and test new hook variations with top creator

Lead with an emotional hook.

Standardize "I want him around as long as possible" and similar longevity/love angles as the default opening hook across the creator roster. Pair with dental/fresh breath outcomes for TikTok-optimized content. Retire generic brand-name-first scripts immediately.

Content Strategy: What's Working & What's Not

What Wasn't Working

Long-form Educational Scripts

Detailed gut-health explainers consistently **underperformed**, generating low likes. The audience prefers emotional connection over scientific lectures.

Instagram

Cross-posted videos on IG received **20-40 likes** vs. 300-800 on TikTok. Inflated views are hollow; optimization efforts here are largely wasted.

Generic Lifestyle Captions

Phrases like "only the best for my baby" had the **lowest engagement ceilings**, failing to stop scrolls or drive interaction.

Talking heads and low quality

Low quality videos sometimes never made it past the 200 view jail

What to Keep Doing

The Longevity/Love Angle

The "I want him around as long as possible" hook is the **single best-performing hook**. It needs to be replicated across all creators.

The "Finally Found It" Narrative

Posts implying a long, frustrating journey before BetterWild generate more comments and shares. This **relief narrative** resonates strongly.

Prioritize Lauren Stein

Lauren generates **42% of all campaign likes**. Her unique style, pacing, and dog's personality are clear drivers of engagement.

Short Emotional B-Roll Format

The sad music + zoom + empathy copy is a **winning format**. Continue to lean into this concise, emotionally driven structure.
